

## **Integrity: the quality of being honest and fair.**

Dear Friends and Customer,

Subject: Result of the litigation case between Mind Body and Life Solutions

Puppet Pinocchio's nose grows longer whenever he tells lies. In actual situation the result of the lies may appear in different format. In June 2014, the litigation in the High Court between Mind Body (Asia) Limited ("Mind Body") and Life Solutions ("LS") has come to an end. During the course of litigation, LS denied the fact that they were only one of our dealers. Someone had tried to distort the truth but failed eventually. LS compensated a huge sum of money to Mind Body and made the following open statement:

"Pursuant to the attached Dealer Agreement dated 26 April 2004, Noble Spirit Limited (Trading Name: Life Solutions) was a dealer of Mind Body (Asia) Limited to sell water purification systems of Mind Body (Asia) Limited from April 2004."

The truth is: during the period from April 2004 to May 2011, LS was performing part of the Sales function of Mind Body. Mind Body established in 2000. All the product development, market positioning were all performed by Mind Body. All the products, sales support, pre-and post installation, the subsequence maintenance works and all quality control were provided by Mind Body. LS was just performing a sales function and acting as a dealer to contact the customers to close the deal for us.

Integrity is a word many of us were not taught growing up. Yet it is the core of morality and justice. Integrity is the inner image of oneself, and you look in there and see a man who won't cheat, then you know he will never. Real integrity is doing the right thing for customers. A leader once said "If I could teach only one value to live by, it would be this: a sound integrity system, underpinned by a high probity standard among the populace, is the key to sustainable development." Mind Body has been sticking to it, since we start our business unlike others.

Mind Body has been providing professional water purification facility management to all of you. When you are choosing the Water Purification System Supplier for sustainable services, no doubt you will choose the one with integrity.

Yours faithfully,

Garry Wong (Tel: 3106 3710 E-mail: [garry@mindbody.com.hk](mailto:garry@mindbody.com.hk))
